Practical 12:

Event Management CRUD with Poster Upload and File Validation

Problem Definition Develop event management functionality for admin users. Admin can add, view, update, delete, and upload event posters with file type and file size validation.

db.php — Database connection

```
<?php
$conn = new mysqli("localhost", "root", "", "event_db");

if ($conn->connect_error) {
   die("Database connection failed");
}

$conn->set_charset("utf8mb4");
?>
```

index.php

```
<?php
include 'db.php';

$result = $conn->query("SELECT * FROM events ORDER BY id
DESC");
```

```
?>

<!DOCTYPE html>

OUTPUT:-

AFTER EDITING AND DELETE : -

Key Questions / Analysis / Interpretation

1. Are add, update, and delete functionalities implemented correctly?

Yes. Admin can add new events, update existing event details, and delete events from the database.

2. Is the UI linked with the database correctly?

Yes. PHP connects the user interface to the MySQL database. Event details are stored in and retrieved from the events table.

3. Are poster uploads validated for type and size?

Yes. Only JPG, JPEG, and PNG image files up to 2 MB are allowed. Invalid file types and oversized files are rejected.

4. Are success and failure messages displayed?

Yes. Successful operations redirect to the event list, while validation errors display messages. Database operation failures also display error messages.

Tools/Technology to be Used:-

PHP, MySQL, Bootstrap/Tailwind, XAMPP,VS code
